CIQ series

Crescent Ice Makers CIQ series

Crescent Ice makers CIQ series is modular intelligent ice maker units with automated ice making process. Built-in ice-making control device makes the whole ice making process intelligent and convenient. Features efficient, large capacity ice production with big ice storage. Built-in removable water filter ensures sanitation, health and safety of ice. High density polyurethane foam maintains insulation thus reducing power consumption.

Features

- Dual flushing system ensuring efficient ice production
- High density polyurethane foam ensures effective insulation
- Reduces mineral build-up helping to produce clear, hard crescent cubes
- Built-in removable water filter
- Crescent shape, crystal clear ice output

Applications

Used in supermarkets and sea food markets, chicken processing, sea food and fishing industry, butcher shops, science experiments, biological pharmaceuticals, bakery, winery, chemical, construction, food, vegetables, deep-sea fishing, ice plant, medical, laboratory, mining, artificial ski field, catering etc.
